## Proven Effectiveness - Personal Experience

Pillhelp Works® is the office infrastructure Dr. Thibodeau developed for his own practice. He realized that there was nothing available to pharmacists who wanted to provide MTM consultations to anyone who requested them, and to do so for a consultation fee. Dr. Thibodeau has provided care for an amazing variety of cases.

90% of his patients would not have been eligible for services under the current federal triage protocol. His cases have included all ages. Patients have been simple to complex.

His first case was a physician referral. The physician suggested that the patient pay Dr. Thibodeau for an hour of his time to become educated about his condition and its treatment. The patient needed to decrease his anxiety about his diagnosis in order to take his medication correctly. The patient was middle aged and was taking only one medication! Another case involved a middle-aged man who had a 40 med polypharmacy problem.

## Elements of Application

PillHelp Works® is a robust and dynamic MTM office application. It provides the complete infrastructure needed to establish your practice and to provide services.

- ✓ Compliance with Federal MTM standards of care.
- ✓ Documentation and communications are personalized with your practice information and logo (i.e.. letterhead, e-mails, invoices, and receipts).
- ✓ Time clocks: one to track total time with each patient and another to calculate a time-stamp for each activity generating a fee.
- ✓ Manual Fee and Invoice details override.

## The Independent General MTM Practice Model

Dr. Thibodeau's patient office at Apothicare-360

Our general independent MTM practice model makes a profound impact on our patients. It can bring you a level of professional satisfaction that you have longed for - but thought would be impossible.

Dr. Thibodeau has been successfully providing MTM services for decades. He has always requested, and received, his fees paid "out of pocket". He has fine-tuned this office infrastructure. Now he wants to help you to discover the same professional satisfaction that he has enjoyed.
